INTRODUCTION

1. INTRODUCTION

Halal Assurance Management System (*Halal Assurance Management System*) or also known as HAS was first introduced in 2011 with the launch of *Guidelines for Halal Assurance Management System of Malaysia Halal Certification* published by the Department of Islamic Development Malaysia (JAKIM).

Malaysian Halal Management System/*Malaysian Halal Management System* (hereinafter referred to as MHMS 2020) was introduced to replace *Guidelines for Halal Assurance Management System of Malaysia Halal Certification*. This MHMS 2020 contains details for the implementation of the MHMS which include:

- 1) Internal Halal Control System (IHCS) for use in small and micro industries; and
- 2) Halal Assurance System (HAS) for use by large and medium industries.

The implementation of this MHMS places responsibility on the company and/or applicant to ensure that all Malaysian Halal Certification requirements are complied with at all times.

2. OBJECTIVE

This document aims to explain in detail the requirements for developing, implementing and maintaining halal assurance to meet and comply with Malaysian Halal Certification procedures.

3. SCOPE

This MHMS 2020 is a reference document for use by competent authorities, companies and/or SPHM applicants for the internal halal control system requirements of SPHM holding companies.

This MHMS 2020 should be read together with *Malaysian Standard*, Malaysian Halal Certification Procedure Manual (MPPHM), fatwas, laws, regulations and circulars applied in Malaysian Halal Certification.

4. INTERPRETATION

(1) Internal Halal Audit

Inspections/audits planned and carried out by the company internally to ensure compliance with Malaysian Halal Certification requirements.

(2) Laboratory Analysis

Specific analysis as a supporting procedure for halal determination/ verification implemented and planned by the company and/or applicant.

(3) Halal Executive

An individual responsible for ensuring halal compliance in a company or premises. Halal Executives must meet the following specified requirements:

- (a) Be of Islamic faith;
- (b) Malaysian citizen (subject to the relevant MPPHM);
- (c) Permanent position;
- (d) Hold a minimum of a Diploma in Halal Management or any equivalent qualification or have at least five (5) years of experience in halal management; and
- (e) Possess a Halal Executive Certificate from a Halal Training Provider registered under HPB.

(4) Halal Control Point (HCP)

Halal control points or determinations that need to be identified, controls implemented and contamination can be prevented or eliminated to ensure halal compliance throughout the supply chain.

(5) Internal Halal Committee (JKHD)

A committee officially appointed in writing by the company's top management responsible for developing, implementing, monitoring and controlling the effectiveness of HAS implementation as well as compliance with Malaysian Halal Certification requirements.

(6) Internal Halal Auditor

Individuals appointed by JKHD who are qualified, experienced and competent to conduct internal halal audits.

(7) Halal Risk Control

The method for determining HCPs and halal risk management plans developed and implemented by companies and/or applicants to control and ensure that halal risks can be avoided and managed effectively throughout the halal supply chain.

(8) Traceability (*Traceability*)

The ability to identify and track raw materials and products through every stage comprehensively including receiving, processing, storage, distribution and others along the halal supply chain.

(9) Halal Training

The implementation of specific halal-related training planned and implemented by the company includes internal halal awareness and halal competence.

(10) HAS Manual

A document developed by the company and/or applicant as a guide to the implementation of HAS.

(11) Halal Risk Management Plan

Steps, procedures and planning plan documents developed to manage and control halal risks which include the following elements:

- (a) *Halal Control Point*
- (b) Halal Risk
- (c) Control Mechanism (method, frequency, who)
- (d) Corrective Action
- (e) Records

(12) Competent authority

JAKIM, MAIN/JAIN or any other relevant authority to certify that any food, goods or services related to such food or goods are halal in accordance with the Trade Descriptions (Definition of Halal) Order 2011.

(13) Chairman of the Internal Halal Committee

Qualified, competent and responsible individuals to lead JKHD and are appointed by the company's top management.

(14) Halal Policy

A statement of halal assurance commitment and direction of an organization/company that is documented as a guide for all parties in complying with the requirements of Malaysian Halal Certification.

(15) HAS Review (HAS *Reviews*)

The process of research, assessment, monitoring and approval by the company's top management of the implementation of HAS.

(16) Halal Assurance System/ *Halal Assurance System* (H.A.S.)

A set of procedures used by an organization/company to achieve the objective of maintaining comprehensive halal assurance.

(17) Internal Halal Control System/ *Internal Halal Control System* (IHCS)

Internal halal control procedures for an organization/company consisting of halal policies, raw material control procedures or halal risk control procedures and traceability procedures (*traceability*) as a minimum control measure to maintain halal assurance.

(18) Malaysian Halal Management System/ *Malaysian Halal Management System* (MHMS)

An integrated management system developed, implemented and maintained by an organization/company to manage products and services to maintain halal assurance through IHCS or HAS.

(19) Sertu

Purifying body parts, clothes, places, tools and equipment that have come into contact with impurities *mughallazah* namely dogs, pigs and their offspring by washing them seven (7) times, one of which is with water mixed with soil. It is best to wash the first time with water mixed with soil then followed by six (6) times using absolute or other clean water.

5. GENERAL REQUIREMENTS OF THE MALAYSIAN HALAL GUARANTEE SYSTEM/*HALAL ASSURANCE SYSTEM*(H.A.S.)

Companies and/or applicants must develop and comply with the following general HAS requirements:

(1) HAS Manual

- (a) The company and/or applicant must comply with and implement the developed HAS Manual. The development of the HAS Manual must coincide with the actual implementation of the company's operations;
- (b) The HAS manual should be developed and documented separately from other management and certification systems;
- (c) The HAS manual must be constantly updated if there are changes to the implementation of HAS at the company level;
- (d) The HAS manual must contain at least:
 - (i) company profile;
 - (ii) objectives and scope;
 - (iii) halal policy;
 - (iv) internal halal committee; and
 - (v) procedures (SOPs):
 - a. internal halal audit;
 - b. halal risk control;
 - c. raw material control;
 - d. halal training;
 - e. traceability (*traceability*);
 - f. HAS review (*HASreview*);
 - g. laboratory analysis; and
 - h. ass
- (e) The development, evaluation and review of the HAS Manual must comply with and meet the requirements of MHMS 2020, *Malaysian Standard*, MPPHM, fatwas, laws and regulations, Malaysian Halal Certification circulars and other reference documents related to Malaysian Halal Certification;
- (f) The HAS manual must be approved/certified by the company's top management; and

(g) Each procedure in the HAS Manual must state the following information:

- (i) effective date;
- (ii) update date;
- (iii) provided by; and
- (iv) confirmed by.

(2) Halal Policy

(a) The company and/or applicant must develop a clear halal policy and explain the commitment to providing halal products and/or services as well as the company's compliance with the requirements of the Malaysian Halal Certification as a whole; (**Refer to Appendix A**) and

(b) The Halal policy needs to be displayed and communicated and widely disseminated to organizations and stakeholders.

(3) Halal Executive

(a) For the purposes of the Malaysian Halal Certification requirements, Halal Executives must meet the following requirements:

- (i) Muslim;
- (ii) Malaysian citizen (subject to the relevant MPPHM);
- (iii) permanent position;
- (iv) have a minimum qualification of Diploma in Halal Management or any equivalent qualification or have at least five (5) years of experience in halal management; and
- (v) possess a Halal Executive certificate from a Halal Training Provider registered under HPB.

(b) Must be officially appointed by top management from among permanent staff working in the company;

(c) Must carry out responsibilities and roles in the company's halal management;

- (d) Halal Executive is a specific position that needs to be created by the company with priorities and essential duties related to the scope of halal management; **(Refer to Appendix B)**
- (e) Appointments and assignments outside the scope of halal management must not affect the essential duties of the Halal Executive; and
- (f) If necessary, the Halal Executive can be appointed as the Chairman of JKHD.

(4) Internal Halal Committee (JKHD)

- (a) The company's top management must make official, written appointments with job descriptions for each appointed JKHD member and create an organizational chart;
- (b) The company's top management must provide sufficient human resources with appropriate workload to ensure the planning, implementation and continuous evaluation of HAS and compliance with the requirements of the Malaysian Halal Certification;
- (c) The chairman and members of the JKHD must be from among the employees who hold permanent positions and work in the company;
- (d) The Chairman of JKHD must be of a higher rank or equivalent to a Halal Executive and be competent in relation to aspects of Malaysian Halal Certification;
- (e) JKHD chairman should be given priority to Muslims;
- (f) JKHD membership must consist of at least four (4) members, namely:
 - (i) the chairman;
 - (ii) Halal Executive;
 - (iii) representatives of the purchasing and/or procurement division/unit; and
 - (iv) representative of the processing department.
- (g) Additional JKHD members shall be appointed based on the specific needs of MHMS 2020; (if relevant)

- (h) Establishing a JKHD for each branch if it has different operational management;
- (i) Shall be responsible for the company's halal and HAS management;
- (j) The appointed JKHD must be knowledgeable and competent regarding the requirements of Malaysian Halal Certification;
- (k) The roles/responsibilities and terms of reference of JKHD must be clearly stated in the company's HAS Manual; **(Refer to Appendix C1 & C2)**
- (l) JKHD meetings must be held at least two (2) times a year and have an agenda for discussions related to halal;
- (m) JKHD shall have the authority to make decisions regarding the company's halal management; and
- (n) Records related to JKHD must be kept and easily referenced during Malaysian Halal Certification inspections.

(5) Internal Halal Audit

- (a) The company and/or applicant must establish procedures for the implementation of the company's internal halal audit; **(Refer to Appendix D)**
- (b) Internal halal audits must be carried out at least once (1) per year at each branch/network of premises;
- (c) Internal halal auditors must have a Certificate *Internal Halal Auditing*/Halal Executive Certificate from PLH registered under HPB;
- (d) Internal halal auditors must be officially appointed by JKHD;
- (e) Internal halal audits must cover aspects of compliance with Malaysian Halal Certification procedures and HCP; **(Refer to Appendix E)**

- (f) Non-conformity findings in internal halal audits and corrective actions must be implemented promptly and confirmed by JKHD;
- (g) The audit findings report along with the internal halal audit checklist must be recorded and presented to JKHD;
- (h) The effectiveness and frequency of internal halal audits must be assessed by JKHD to ensure that non-compliance with Malaysian Halal Certification procedures does not recur;
- (i) If necessary, the company may appoint any third party to carry out an internal halal audit on behalf of the company;
- (j) Internal third-party halal auditors must have a Certificate *Internal Halal Auditing* from PLH registered under HPB;
- (k) Implementation of additional audits such as supplier audits and other audits must be carried out by the company if there is a need and interest in compliance with Malaysian Halal Certification procedures; and
- (l) Records related to internal halal audits must be kept and easily referenced during Malaysian Halal Certification inspections.

(6) Halal Risk Control

- (a) The company and/or applicant must establish written procedures for the implementation of halal risk control. The procedures must include:
 - (i) *research and development (R&D)*;
 - (ii) products, menus and services;
 - (iii) processing;
 - (iv) premises and equipment;
 - (v) employees;
 - (vi) packaging;
 - (vii) storage; and
 - (viii) transportation.

- (b) Halal risk controls should be developed specifically for the determination of halal-related risks and separated from other certification systems such as HACCP/ GMP/ Must/ BeSS/ VHM and others;
- (c) Logistics services that have SPHM should be given priority to ensure a secure halal supply chain; and
- (d) Records related to halal risk control must be kept and easily referenced during Malaysian Halal Certification inspections.

(6.1) Determination Halal Control Point (HCP)

- (a) The determination of HCP should be based on:
 - (i) processing flow; (**Refer to Appendix F1, F2, F3 & F4**) and
 - (ii) floor plan. (**Refer to Appendix G**)
- (b) The development of a processing/service flow chart should clearly explain the HCP of a product/service production.

(6.2) Halal Risk Management Plan

- (a) Should be developed based on the determination of identified HCPs; and
- (b) Should contain the following information: (**Refer to Appendix H**)
 - (i) HCPs;
 - (ii) halal risk;
 - (iii) control mechanisms (method, frequency, who);
 - (iv) corrective action; and
 - (v) records.

(7) Raw Material Control

- (a) The company and/or applicant must establish written procedures for the control of raw materials and/or merchandise which include the purchasing process,

receipt and storage and have records and can be reviewed; (
Refer to Appendix I)

(b) The developed raw material control procedures should ensure:

- (i) there is no use and/or storage of raw materials whose halal status is questionable;
- (ii) the use and change of raw materials must be declared to the competent authority; and
- (iii) the use of raw materials must comply with relevant laws and regulations.

(c) A Master List of Raw Materials should be established. (*Raw Material Masterlist*) which can be referred to/reviewed during the Malaysian Halal Certification inspection;

(d) The Raw Material Master List must contain at least the following information: (**Refer to Appendix J**)

- (i) the name of the raw material;
- (ii) scientific name/*coding/trade name*;
- (iii) source of raw materials;
- (iv) name and address of the raw material producer;
- (v) information on the status of declaration of raw materials to competent authorities;
- (vi) halal certificate information for raw materials:
 - a. halal certification body
 - b. Halal certificate expiration date
- (vii) supporting documents (raw materials that do not have a halal certificate must state information about the source of the raw materials along with supporting documents proving the source of the raw materials); and
- (viii) notes.

(e) The Master List of Raw Materials must include all raw materials including processing aids. (*processing aids*) which is used and constantly updated in case of any changes in raw material information;

(f) The Master List of Raw Materials in digital/printed form must be easily accessible and reviewable; and

- (g) Records related to raw material control must be kept and easily referenced during Malaysian Halal Certification inspections.

(8) Halal Training

- (a) The company and/or applicant must establish written procedures for the implementation of halal training that includes halal awareness and halal competence;
- (b) Halal awareness training must be conducted by individuals or organizations registered under HPB;
- (c) Halal awareness training must be provided to new employees within three (3) months from the date of appointment and must cover the scope related to the halal concept and Malaysian Halal Certification procedures;
- (d) Halal awareness training must be carried out at least once every three (3) years to all employees involved in processing and/or service activities;
- (e) Evaluation of halal awareness training should be conducted to assess the level of understanding and its effectiveness;
- (f) Halal competency training for JKHD must be carried out by PLH registered under HPB and/or competent authorities;
- (g) KHD members must be given halal competency training at least once every three (3) years for an understanding of the Malaysian Halal Certification requirements which is not limited to the following scope:
 - (i) understanding of sharia and fatwas;
 - (ii) *Malaysian Standard*;
 - (iii) MPPHM;
 - (iv) MHMS;
 - (v) legislation relating to halal; and
 - (vi) critical ingredients (if applicable)
- (h) The company's top management must provide sufficient financial funds for the purpose of implementing halal training;

(i) Create a Training Operations Plan (POL) containing the following information: **(Refer to Appendix K)**

- (i) type of training;
- (ii) participants;
- (iii) frequency;
- (iv) date of proposal;
- (v) teaching staff; and
- (vi) records.

(j) The company is encouraged to establish a halal information/ briefing program for all staff and workers at every level within the company or relevant third parties such as brand owners, suppliers, transportation providers, visitors and others deemed necessary on an ongoing basis or as needed; and

(k) Records related to halal training must be kept and easily referenced during Malaysian Halal Certification inspections.

(9) Traceability*(Traceability)*

(a) The company and/or applicant must establish traceability procedures (*traceability*) in writing to ensure product withdrawal and/or recall (*product withdrawal/recall*) can be done if there is any halal non-compliance/contamination of the products that have been produced; **(Refer to Appendix L1, L2 & L3)**

(b) Traceability system (*traceability*) can be combined with other detection systems;

(c) *Mock recall* must be implemented at least once (1) year for companies and/or applicants who are required to implement HAS; and

(d) Traceability related records (*traceability*) and product withdrawal and/or recall (*product withdrawal/recall*) should be kept and easy to refer to during the Malaysian Halal Certification inspection.

(10) HAS Review (*HASReviews*)

- (a) The company and/or applicant must establish a HAS review procedure;
- (b) HAS Review (*HASReviews*) shall include:
 - (i) the effectiveness of the developed HAS; and
 - (ii) the capabilities and effectiveness of the appointed JKHD members.
- (c) Must be carried out at least once (1) year by JKHD and involve the company's top management;
- (d) Must be validated and certified in writing by the company's top management; and
- (e) Records related to HAS Review (*HASReviews*) should be kept and easily referenced during the Malaysian Halal Certification inspection.

(11) Laboratory Analysis

- (a) The company and/or applicant must establish written procedures regarding the implementation of laboratory analysis at the company level; (if relevant)
- (b) Laboratory analysis should prioritize products that contain critical halal ingredients;
- (c) Should be carried out in the following laboratories:
 - (i) *Malaysia Halal Analysis Center*(MyHAC);
 - (ii) Department of Chemistry Malaysia; or
 - (iii) Appointed Halal Panel Laboratories. The list of JAKIM halal panel laboratories can be consulted on the Halal Malaysia portal, www.halal.gov.my
- (d) Halal analysis can cover the following scopes:
 - (i) meat speciation (DNA);
 - (ii) alcohol content;
 - (iii) physical (skin and fur);

- (iv) proteins (*profiling* and source determination);
- (v) fats and oils (*profiling* and source determination); or
- (vi) Other scope of analysis determined by the competent authority

(e) Records related to laboratory analysis must be kept and easily referenced during Malaysian Halal Certification inspections.

(12) Sertu

- (a) The company and/or applicant must establish written procedures for the implementation of the certification in preparation in the event of contamination or non-compliance with the certification process;
- (b) The developed certification procedures must be in line with the Certification Guidelines According to an Islamic Perspective published by JAKIM and the regulations set by MAIN/JAIN; and
- (c) Relevant records must be kept and easily referenced during the Malaysian Halal Certification inspection.

(13) Documentation and Records

- (a) Must always be updated and recorded perfectly and easily referable during Malaysian Halal Certification inspections;
- (b) Must be kept for at least three (3) years;
- (c) Must have at least three (3) months of records for new applications for the purpose of Malaysian Halal Certification inspection; and
- (d) Supporting documents stored in separate files must have a reference number, be well recorded and easy to refer to.

6. GENERAL REQUIREMENTS FOR INTERNAL HALAL CONTROL SYSTEMS/ *INTERNAL HALAL CONTROL SYSTEM (IHCS)*

The company and/or applicant must develop the IHCS Manual in compliance with the following requirements:

- (1) Create a halal policy; **(Refer to general requirements HAS 5 (2))**
- (2) Develop raw material control procedures and/or halal risk control; **(Refer to general requirements HAS 5 (7) and/or 5 (6))** and
- (3) Develop traceability procedures (*traceability*). **(Refer to general requirements HAS 5 (9))**

7. SPECIFIC REQUIREMENTS OF THE MALAYSIAN HALAL ASSURANCE SYSTEM (HAS) AND INTERNAL HALAL CONTROL SYSTEM (IHCS) ACCORDING TO THE SCHEME

The company and/or applicant must comply with and implement the specific requirements of HAS and IHCS for the Malaysian Halal Certification Scheme as follows:

(1) FOOD & BEVERAGE PRODUCTS, COSMETICS, PHARMACEUTICALS, CONSUMABLES AND MEDICAL DEVICES

The implementation of the MHMS for the Food and Beverage, Cosmetics, Pharmaceuticals, Consumer Goods and Medical Devices Schemes based on industry categories is as follows:

(a) Large and Medium Industries

Implement HAS requirements comprehensively by meeting the general requirements contained in MHMS 2020.

The company and/or applicant must:

- (i) involving representatives of the Division R&D as a member of JKHD;
- (ii) create a flow chart for each different product processing stream; **(Refer to attachments F1, F3 and F4)** and
- (iii) appoint a Halal Executive for each branch of the premises.

(b) Small and Micro Industries

Companies and/or applicants must implement the IHCS requirements by meeting the following requirements:

- (i) creating a halal policy;
- (ii) develop raw material control procedures; and
- (iii) develop traceability procedures (*traceability*).

(2) FOOD PREMISES

The implementation of HAS for the Food Premises Scheme based on the premises category is as follows:

(a) Hotels

Implement HAS requirements comprehensively by fulfilling the requirements contained in MHMS 2020.

The company and/or applicant must:

- (i) involves *Food & Beverage Manager* and/or head cook as a member of JKHD; and
- (ii) appoint a Halal Executive for each branch of the premises.

(b) Catering/Food Service/Convention Center Kitchen

(i) Large and Medium Industries

Implement HAS requirements comprehensively by fulfilling the requirements contained in MHMS 2020.

The company and/or applicant must:

- a.* involves *Food & Beverage Manager* and/or head cook as a member of JKHD; and
- b.* Appoint a Halal Executive for each branch of the premises.

(ii) Small and Micro Industries

Companies and/or applicants must implement the IHCS requirements by meeting the following requirements:

- a.* creating a halal policy;
- b.* developing raw material control procedures; and
- c.* develop procedure traceability (*traceability*).

(c) Cafeteria (Centrally Managed)

Implement HAS requirements comprehensively by fulfilling the requirements contained in MHMS 2020.

The company and/or applicant must:

- (i) appoint a Halal Executive at the management level;
- (ii) provide HAS documents during inspection; and
- (iii) ensure that Internal Halal Audits are carried out at all premises under its management.

(d) Chain Food Premises

Implement HAS requirements comprehensively by fulfilling the requirements contained in MHMS 2020.

The company and/or applicant must:

- (i) appointing Halal Executives at the central management/ kitchen level for each different chain brand;
- (ii) develop HAS for centralized kitchens and cover a network of premises; (if relevant)
- (iii) involving operations managers as members of the JKHD;
- (iv) prepare HAS documents for review during inspections of central kitchens and/or premises;
- (v) ensure that internal halal audits are carried out across the entire network of premises; and
- (vi) provide a list of premises under the same brand/owned chain.

(e) Other Food Premises

Companies and/or applicants must implement the IHCS requirements by meeting the following requirements:

- (i) creating a halal policy;
- (ii) develop raw material control procedures; and
- (iii) develop traceability procedures (*traceability*).

(3) SLAUGHTERHOUSE

(a) Large and Medium Industries

Implement HAS requirements comprehensively by fulfilling the requirements contained in MHMS 2020.

The company and/or applicant must:

- (i) involves at least one supervisor and/or slaughterer as a member of the JKHD; and
- (ii) appoint a Halal Executive for each branch of the premises.

(b) Small Industry

The company and/or applicant must implement the IHCS by meeting the following requirements:

- (i) creating a halal policy;
- (ii) develop halal risk control procedures; and
- (iii) develop traceability procedures (*traceability*)

(4) LOGISTICS

(a) Large and Medium Industries

Implement HAS requirements comprehensively by fulfilling the requirements contained in MHMS 2020.

The company and/or applicant must:

- (i) Establish halal risk control procedures involving additional activities in warehousing areas and/or

retail (*cross-docking*, bulk burst, *consolidating* and so on);

- (ii) Establish halal risk control procedures for third party contracts; (if relevant)
- (iii) Develop halal control procedures for the acceptance or selection of trade (retail) products along with a list of products with complete halal risk control; (if relevant) and
- (iv) appoint a Halal Executive for each branch of the premises.

(b) Small and Micro Industries

The company and/or applicant must implement the IHCS by meeting the following requirements:

- (i) creating a halal policy;
- (ii) develop halal risk control procedures and additional halal control procedures for specific needs 7 (4) (a) (i) (ii) and (iii) whichever is relevant; and
- (iii) develop traceability procedures (*traceability*).

(5) CONTRACT MANUFACTURING/OEM SCHEME

(a) Large and Medium Industries

Implement HAS requirements comprehensively by fulfilling the requirements contained in MHMS 2020.

The company and/or applicant must:

- (i) involves parts *R&D* and/or the raw material receiving section as a member of JKHD;
- (ii) develop halal control procedures for customer acceptance as well as customer raw material acceptance;
- (iii) provide a list of customers, a list of raw materials and manufactured products; and
- (iv) appoint a Halal Executive for each branch of the premises.

(b) Small and Micro Industries

Companies and/or applicants must implement the IHCS requirements by meeting the following requirements:

- (i) creating a halal policy;
- (ii) develop raw material control procedures and/or halal risk control;
- (iii) develop additional halal control procedures for specific requirements 7 (5) (a) (ii) and (iii); and
- (iv) develop traceability procedures(*traceability*).

8. ASSESSMENT AND RATING

(a) Carried out during the Malaysian Halal Certification inspection by the competent authority;

(b) Changes in rating levels and/or grades are subject to review by competent authorities from time to time;

(c) Ratings are determined based on the following levels or grades:

LEVEL	GRADE	DESCRIPTION
Very Satisfactory (86%-100%)	A	(i) Full compliance with the requirements of MHMS 2020 and the Malaysian Halal Certification Procedure. (ii) No NCR findings on routine Malaysian Halal Certification application. (iii) Control lawful internal overall effective. (iv) Can be used as a benchmark for other companies. (v) The company can be recommended for the process <i>fast track</i> and company <i>Whitelist</i>. (vi) A certification period of up to five (5) years may be offered.
Satisfying (66% - 85%)	B	(i) Committed to complying with the requirements of MHMS 2020 and the Malaysian Halal Certification Procedures in full. (ii) The discovery of NCR in the category of minor errors is very minimal in the routine application for Malaysian Halal Certification. (iii) Committed to improving more effective internal halal controls. (iv) Consideration may be given to the process <i>fast track</i> and company <i>Whitelist</i>.

Not Satisfactory (41% - 65%)	C	(i) Complying only part MHMS 2020 requirements and Malaysian Halal Certification Procedures. (ii) The discovery of NCR in the category of minimal minor errors in the routine application for Malaysian Halal Certification. (iii) Ineffective internal halal controls. (iv) Not recommended for processing <i>fast track</i> and company <i>Whitelist</i>.
Very No Satisfying (40% and below)	D	(i) No MHMS documents have been developed. (ii) Does not comply with most of the requirements of MHMS 2020 and the Malaysian Halal Certification Procedure. (iii) Ineffective internal halal controls. (iv) Not eligible for recommended process <i>fast track</i> and company <i>Whitelist</i>.

9. MISCELLANEOUS

- (1) The Malaysian Halal Certification Panel has the right to consider, evaluate, review and make any decision on the implementation of the MHMS of the company and/or applicant to improve and ensure the integrity of the Malaysian Halal Certification;
- (2) Any non-compliance with the implementation of MHMS 2020 by the company and/or applicant may affect the application for the Malaysian Halal Verification Certificate;
- (3) Notwithstanding the provisions in this MHMS 2020, the competent authority may exempt any provision in this procedure if deemed necessary and reasonable;
- (4) The competent authority may add, amend and repeal any provision in the MHMS 2020 through the Malaysian Halal Certification Circular and/or announcement through the official portal of the competent authority before enforcement; and
- (5) If there is any confusion and/or contradiction in the meaning of this MHMS 2020, then the MHMS 2020 Malay edition document shall be the authentic and final reference.

Appendix C2

TERMS OF REFERENCE OF THE INTERNAL HALAL COMMITTEE (JKHD)

(1) Introduction

The Internal Halal Committee (JKHD) is a committee appointed by the company's top management. JKHD was established to meet the requirements of the Halal Assurance System (HAS) based on the Malaysian Halal Management System Manual (MHMS) 2020 as set by the competent authority.

(2) Objective

These terms of reference are intended to serve as a guide for JKHD in ensuring that HAS is implemented effectively.

(3) Role

- (a) Develop HAS and related documents;
- (b) Ensure HAS is implemented effectively;
- (c) Ensure that the effectiveness of HAS is constantly regulated;
- (d) Review and confirm SOPs;
- (e) Discuss and establish Halal Policy, Master List of Raw Materials (*Raw Material Masterlist*), Halal Risk Management Plan, and other related HAS activities;
- (f) Reviewing the effectiveness and updating the company's HAS;
- (g) Responsible for ensuring that the entire Malaysian Halal Certification process is implemented perfectly.

(4) Meeting Procedures

- (a) The frequency of JKHD meetings is at least two (2) times a year and depends on the needs from time to time;
- (b) The Chairman of JKHD may delegate authority to members deemed qualified to chair meetings in his absence;
- (c) The quorum for meeting members must be at least four (4) people to convene;
- (d) The decisions of the meeting must be decided by mutual consent;
- (e) The results of the discussions and decisions of the meeting must be documented in writing through meeting minutes and confirmed; and

- (f) The results of the JKHD meeting must be presented to top management for any approval.

(5) Appointment And Membership Conditions

(a) Appointment

- (i) the appointment of JKHD members is made by the company's top management; and
- (ii) Appointments may be cancelled if the member has resigned or transferred or is directed by top management.

(b) Membership

Membership consists of:

- (i) a representative from the top management who is a Muslim as the Chairman;
- (ii) Halal Executives who are recognized by HPB and have a permanent position as coordinators;
- (iii) a representative from the Purchasing Division; and
- (iv) a representative from the Processing Division/Halal Supervisor.

(c) Change

Any changes involving membership will be reviewed and new appointments will be made. Changes will also be made if there is a JKHD that is not functioning or effective.

(6) Cover

These terms of reference are also subject to any amendments from time to time.

HALAL ASSURANCE SYSTEM (HAS)

INTERNAL HALAL AUDIT PROCEDURES

DOCUMENT REFERENCE:		EFFECTIVE DATE:	
		UPDATE DATE:	
ALL INFORMATION		SECTION:	
		NUMBER OF PAGES:	
Provided By:	Reviewed By:	Verified By:	
..... (Halal Executive)	 (Chairman of JKHD)	 (Top Management)	

Internal Halal Audit Procedures

(1) Objective

- (a) Ensure compliance with Malaysian Halal Certification procedures;
- (b) Minimize non-conformity reports (NCRs) by competent authorities during auditing and monitoring; and
- (c) Improvements to established systems and procedures.

(2) Scope

- (a) The scope of internal halal auditing includes document inspection and field inspection; and
- (b) Inspections cover compliance with the entire Malaysian Halal Certification Procedure.
- (c) Inspections cover compliance across the entire premises or network of premises.

(3) Responsibility

Internal halal audits are carried out by competent auditors appointed by JKHD.

(4) Activities

- (a) Frequency;
Internal halal audits are conducted at least once every six (6) months.

(b) Implementation;

- Internal halal audits are conducted using the following methods: (i) document review;
(ii) interviews and cross-examination between departments;
(iii) observation;
(iv) preparation of reports; and
(v) notification of audit results.

(c) Auditor;

- (i) internal halal audits are conducted by competent auditors appointed by JKHD; and
(ii) auditors must consist of representatives from different divisions to ensure the integrity of the audit.

(d) Auditee;

- Auditee* are all staff from the relevant departments: (i) Purchasing Department;
(ii) Receiving & Warehousing Division;
(iii) Transportation Division;
(iv) Human Resources & Documentation Division;
(v) Operations/Production Division;
(vi) Chain Outlet Division; and
(vii) Other relevant sections.

(5) Corrective Action

Corrective actions must be taken if any non-compliance related to Malaysian Halal Certification procedures, HAS implementation and syariah requirements are detected during the audit.

(6) Corrective Action Period

Corrective actions must be implemented within 14 days or a period of time agreed between the auditor and the *auditee*.

(7) Documents

Internal halal auditors must use the following documents:

- (a) Audit checklist;
(b) Audit form; and
(c) Non-conformity form.

Raw Material Control Procedures

(1) Objective

Ensure the purchase, receipt and storage of raw materials meet the requirements of the Malaysian Halal Certification Procedure.

(2) Scope

Employees involved in the purchasing, receiving and storage of raw materials.

(3) Responsibility

- (a) Purchasing: Purchasing Division Officer (*Purchasing Officer*)
- (b) Reception: Reception Division Officer (*Receiving Officer*)
- (c) Storage: Storage Division Officer (*Warehousing Officer*)

(4) Frequency

Every time a transaction occurs.

(5) Procedure

(a) Raw Material Purchase

- (i) ensure that the purchase of raw materials is in line with list of suppliers approved by JKHD;
- (ii) ensure that the raw materials purchased have a copy of a recognized halal certificate that is still valid and documents

- relevant support such as flow charts/raw material sources/MSDS/CoA and questionnaires;
- (iii) ensure that any changes in the purchase / exchange of raw materials are notified to JKHD and the competent authorities;
- (iv) purchase records must be kept systematically (invoices/receipts/DO/PO);
- (v) inform JKHD of any issues related to halal; and
- (vi) conduct monitoring of HCP and take corrective action if non-compliance occurs.

(b) Raw Material Receipt

- (i) ensure that the receipt of raw materials is in accordance with the list of suppliers approved by JKHD;
- (ii) ensure that the receipt of raw materials is accompanied by a copy of a recognized and valid halal certificate and relevant supporting documents such as flow charts/raw material sources/MSDS/CoA and questionnaire forms;
- (iii) ensure that any changes in raw materials are notified to the competent authorities;
- (iv) inform JKHD of any issues related to halal;
- (v) conduct HCP monitoring and take corrective action if non-conformance occurs;
- (vi) ensure that the packaging information of the raw materials received can be identified as the actual producer and halal status;
- (vii) records of receipts shall be kept for traceability purposes;
- (viii) handle incoming goods according to the prescribed SOP; and
- (ix) ensure that contaminated goods or those that do not meet the supplier's specifications are quarantined and issue a return note or disposal form (*Return Note/ Disposal Form*).

(c) Raw Material Storage

- (i) inform JKHD of any related issues with halal;
- (ii) conduct monitoring of HCP and take corrective action if non-conformance occurs;
- (iii) ensure that the packaging information of the raw materials received can be identified as the actual producer and halal status;

- (iv) handle stored goods according to prescribed SOPs and good storage practices;
- (v) ensure that contaminated goods or those that do not meet the supplier's specifications are quarantined and issue a return note or disposal form (*Return Note/Disposal Form*); and
- (vi) records of storage must be kept for traceability purposes.

(6) Records

- (a) Purchase: invoice/receipt/DO/PO
- (b) Reception: Reception record/*Return Note/Disposal Form*
- (c) Storage: Storage records/*Stock Card/ Return Note/Disposal Form*

..... (Halal Executive)	 (Chairman of JKHD)	 (Top Management)	

Traceability Procedure

(1) Objective

Ensuring that products can be traced at all stages, one (1) step back to where the material came from and one (1) step forward to where the final product will be.

(2) Responsibility

Responsible officer: (Specify who is responsible)

(3) Procedure

(a) Determination of Final/Semi-Final Product Marks

- (i) the final/semi-final product has a production date/expiration date or has a batch number/lot number or barcode; and

(b) Product Label Determination Method

The product is labeled/packaged with the following information:

- (i) name and address of the company (SPHM holder);
- (ii) product name;
- (iii) halal logo; and
- (iv) expiry date/issue date

(c) Distributor/Seller Information

Distributors/sellers are recorded with the following

- information: (i) distributor's name and address;
- (ii) external transport contracts; and

(iii) delivery note

(d) Processing Information

Processing is recorded with the following information:

- (i) production records/ *Batch Manufacturing Record* (BMR)/product formulation record/recipe; and
- (ii) product analysis records

(e) Raw Material Supplier Information

Raw material suppliers are recorded with the following information:

- (i) name of raw material;
- (ii) the name and address of the supplier;
- (iii) the name and address of the manufacturer;
- (iv) *establishment no./consignment note*/ import permit;
- (v) halal certificate;
- (vi) product specifications, material flow charts and sources of raw materials;
- (vii) raw material invoice / purchase receipt / Delivery Order;
- (viii) *Certificate of Analysis* (COA); and
- (ix) external transport contracts

(4) Frequency

Mock recall implemented at least once (1) year to ensure the traceability system is functioning properly.

(5) Action

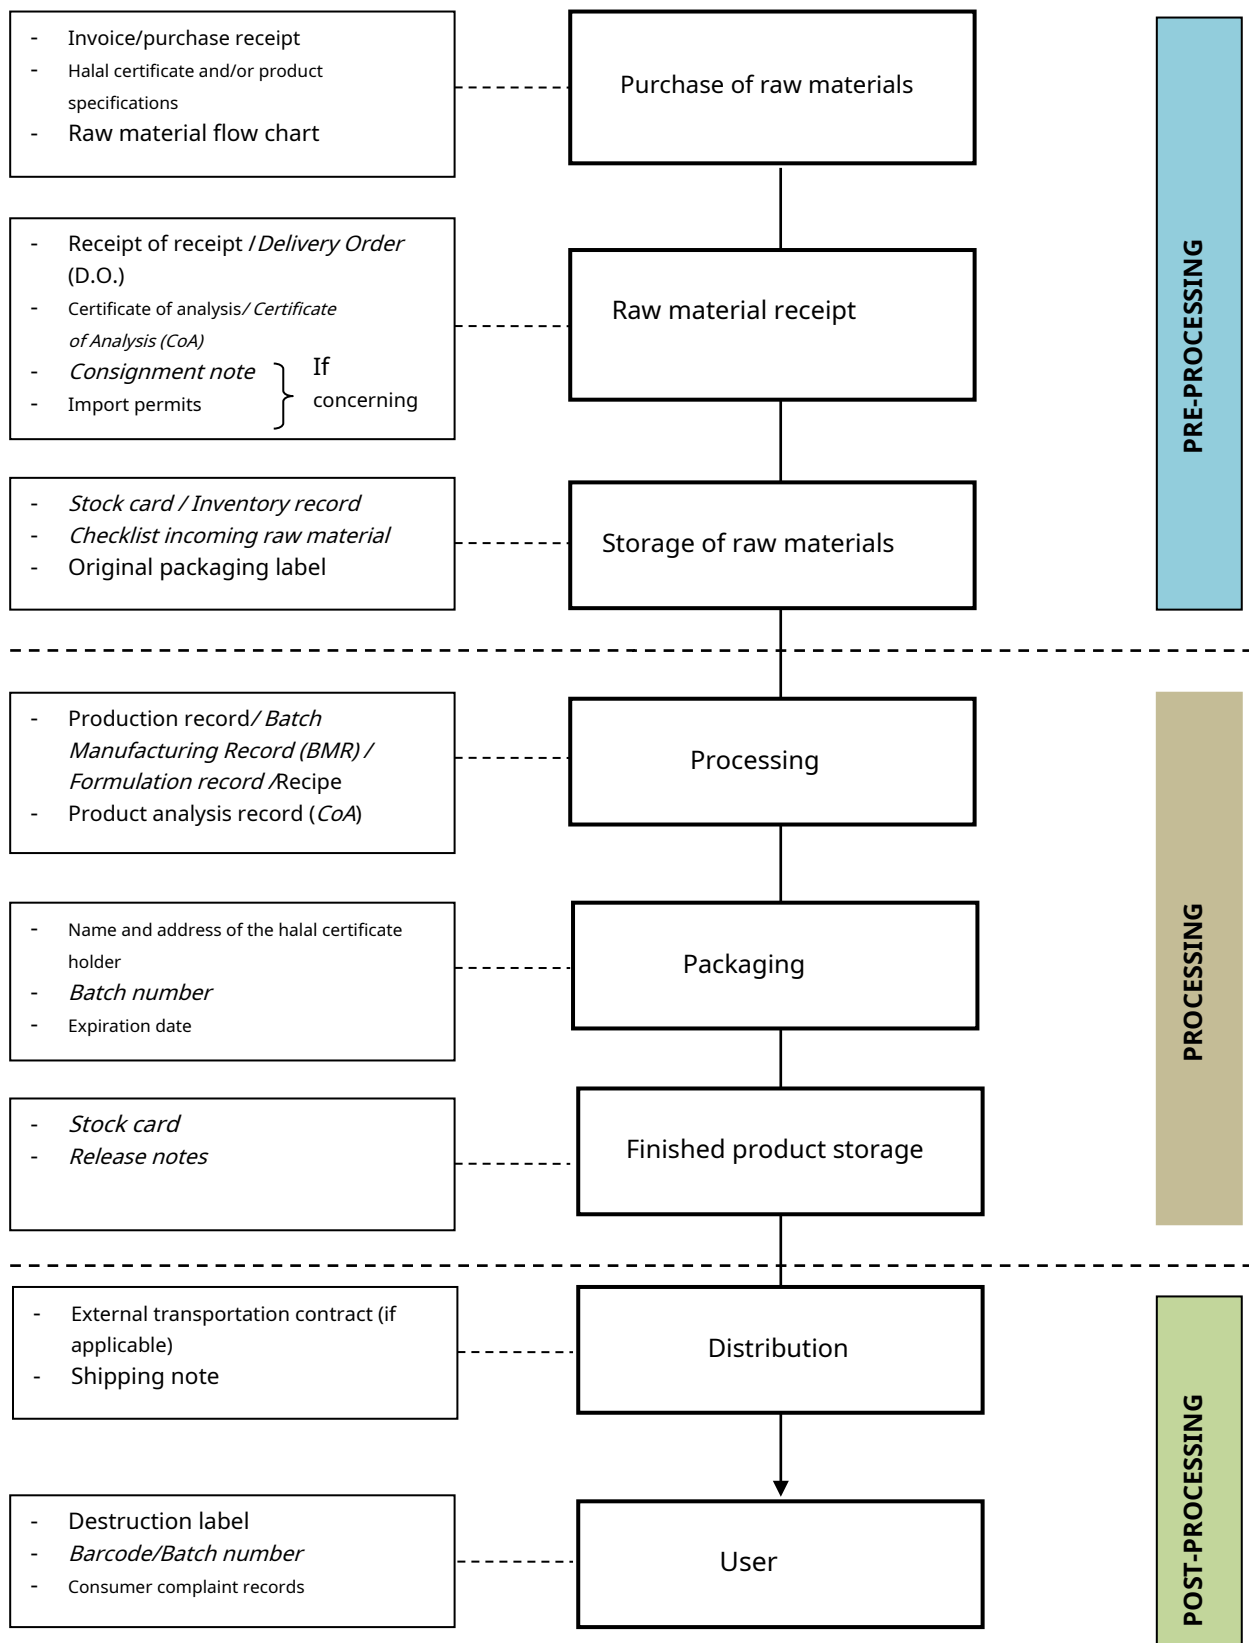

In the event of halal contamination, the following actions are taken:

Action First	1. Identify the product involved 2. Confirm whether the product is factory-made or not 3. Separate the remaining products if they are still in the factory
Action Second	1. Identify the products involved in the market 2. Take necessary action (withdraw and join) 3. Notify the authorities
Action Third	1. Identify the cause at the factory (batches involved during the process) 2. Take appropriate action
Action Fourth	1. If the problem is caused by raw materials, identify the raw materials and suppliers 2. Take appropriate action
